DIAGRAM 1  
Lamp Components

1. GLASSTOP
2. MAX 6W BULB (NOT SUPPLIED)
3. LAMP HOLDER E27 (E26 USA)
4. WEIGHT
5. TWO CORE ELECTRIC FLEX WITH WOVEN FABRIC SHEATHING
6. CERAMIC BASE
7. METAL WASHER & SCREW

#### To assemble:

- 1 Carefully remove the glass top of the duo light (1) and place it to one side. The Lamp Holder (3) and weight (4) will already be screwed into the bottom of the Duo light (6). All you have to do is screw the E27 (E26 USA) light bulb of Max 6W (2) into the lamp holder (3). Then carefully place the glass top (1) back on.

#### To secure:

- 1 If you wish to secure the Duo lamp to a surface, first decided where you want the lamp to be placed. Once you have decided mark and drill a hole into the surface.
- 2 Now carefully remove the glass top (1) and place to the side. Unscrew the lamp holder (3) and weight (4) from the bottom of the Duo lamp (6).
- 3 Next position the bottom of the Duo lamp (6) in the place you wish to secure it to. Push the screw (8) through the hole you have drilled into the surface and through the hole the base of the duo lamp. Now screw on the weight(4) and lamp holder (3) back to the bottom of the Duo lamp and it will be secured. Depending on the surface you wish to secure the lamp to you may need a longer screw than we supply (4mm screw diameter).
- 4 Finally screw in a light bulb of Max 6W (2) into the lamp holder (3) and carefully place the glass top (1) back on.

#### Safety Information

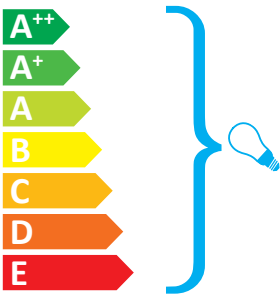

- The glass shade can fall out and brake if the lamp falls over. It is recommended to secure the lamp to a surface to prevent this.
- Always place the lamp on a flat and stable surface
- Ensure a light bulb Max 6W is used. We recommend an LED light bulb.
- If the light bulb breaks ensure lamp is unplugged before handling the light bulb.
- Do not insert fingers in to lamp holder if there is no light bulb and lamp is plugged in. Always ensure lamp is unplugged before making any changes.

Hand&Eye II Duo

 This luminaire is compatible with bulbs of the energy classes:
